| Model | Main use | External W x D x H (mm) | Furniture | Reference EXW (USD) |
|---|---|---|---|---|
| MP1 | Private calls; compact one-person space | 1000 x 1000 x 2200 | Desk + one seat | 1,380 |
| MP1+ | More room for one person's seated work | 1200 x 1200 x 2200 | Desk + one seat | 1,650 |
| MP2 | One shared two-person conversation | 2000 x 1000 x 2200 | Seating/table optional | 2,380 |
| MP3 | One shared meeting for 3-4 people | 2000 x 1600 x 2200 | Seating/table optional | 3,650 |

## Choose the space, then the configuration

One to three standard units are welcome; MOQ is 1. MP1 and MP1+ are single-person models. For simultaneous separate calls, choose separate call spaces. MP2 and MP3 are shared meeting rooms. Lighting and ventilation are included; agree the destination voltage, sockets and selected furniture in the quotation. MP1/MP1+ desks are normally 760 mm above the floor. Height and depth changes are agreed at the factory; this is separate from an adjustable desk.

## Budget for the delivered project

Prices above are July 19, 2026 EXW references, not current delivered offers. MP2/MP3 seating-and-table sets are quoted separately. Request the current configuration, quantity, freight, import costs, delivery endpoint and local handling/assembly together. Your quotation identifies included work and costs arranged locally.

## Production, delivery and setup

Standard production is normally 15-20 days after details are confirmed; custom projects are about 30 days. Shipping time is separate and depends on the route. Each pod ships as one package. Plan 2-3 people and about one hour for panel assembly with video guidance, plus local handling and electrical work as needed. A standard 2200 mm pod needs at least 2400 mm of room height for assembly; caster versions need a separate height check. Local installation labour is arranged by the buyer.

## Understand the acoustic figure

In a MobileX factory test, sound inside was about 35 dB lower than outside (about 80 dB outside, 45 dB inside, door closed, fan running). This is a factory level-difference test, not a laboratory rating. Results at your site depend on the room, noise and configuration.

## Start with three details

Tell us the use (calls, desk work or shared meetings), quantity and destination country/postal code. An undecided model is welcome: choose "Not Sure / Need Recommendation" on the inquiry form. For a firm quote, add the selected configuration, delivery scope, access and required date.
